Afrikaner laithful marking the 36th anniversary of their rise to political power. Afrikaners, he told the

crowd, must "come out of the laager," the Afrikaans term for the circle of wagons. Continued isolation, he warned, will sub-ject white-ruled South Africa to a future of "so many boycotts, lack of good will, and so much resentment that it will choke in its loneliness. I do not believe Jus is the firm path to take.

It was a revealing admission from the political leader of Africa's white tribe, a self-styled "chosen people" who rule the

only 8 percent of the country's 32 million people. During the past four decades they have constructed the world's most rigid system of legalized racial

segregation, known as apart-For generations, the Dutch-descended Afrikaners have prided themselves on their toughness, their unity and their willingness to stand defiantly alone against both the black majority within their borders and a critical world outside. They are, in the words of the historian Hermann Giliomee, himself a member of the tribe, "politically the loneliest people in the world."

The subtle shift in attitude suggested in Mr. Botha's speech one of several important changes that have quietly begun to alter the political and social face of Afrikanerdom.

changes is the rise of a new rightist movement that has broken ranks with Mr. Botha's rul-(Continued on Page 2, Col. 4)

McNamara Assails Reagan's Policy on **Population Growth**

By David Treadwell
Los Angeles Times Service

WASHINGTON - Robert S. McNamara, former president of the World Bank, has criticized the Reagan administration's policy of denying financial aid to family planning groups that support abor-tion as a means of curbing population growth.

Mr. MeNamara spoke on the eve of the second United Nationssponsored International Conference on Population, which opened Monday in Mexico City. He called the administration's policy "very. very unfortunate."

"It will lead to more abortions," he said, "because such organiza-tions as International Planned Parthe world for population plan-

Mr. McNamara, in a television interview, said that unless something was done to bring down the explosive rates of population growth, many Third World countries would suffer disastrous political and economie upheavals.

He took issue with the administration's argument that the world was overreacting to the population William A. Orme Jr. problem, an argument that U.S. officials are expected to reiterate at the Mexico City conference.

A U.S. policy paper prepared for the conference says that too much mment control and planning in Third World countries has held back economic growth that could have led to a birth rate decline, It emphasizes "sound economie policies" over a policy to intervene to reduce population growth. "Americans will be laughed out

of the conference if they stress that theme," Mr. McNamara said. "It's However, James L. Buckley, the former Republican senator from New York, said on the same pro-gram that he does not "expect flak"

over the administration's position.

Mr. Buckley heads the U.S. delegation to the conference.
"There'll be 85 questions before
this conference having to do with almost everything except economic development," he said. "But we feel the responsibility to state our nonest belief as to what direction coun-

able to cope with the larger number enthood, now substantially depen-dent nn U.S. funding will no longer receive U.S. funds, and yet it of the former British colony of Sinis one of the most effective forces in gapore, said population growth the world for population plan could be beneficial in some cases

U.K. Coal Board Fails to Bus Miners Past Pickets

LONDON — An attempt by the state-run National Coal Board on Monday to bus moderate Scottish miners back to work past striking pickets failed as Britain's coalfield walkout entered its 22d week.

Only 57 of the 10,000 miners in Fife, Midlothian and Ayrshire, escorted by police, braved a gauntlet of stone-throwing pickets to report for work, according to a coal board spokesman, Bill Magee.

The poor response to the backlicly committed himself to tax in- to-work attempt came amid moves "I will propose no increase in creases. As a result, economists are by leftist leaders of nine major la-

bor unions, including the Transsenses," Mr. Todd said in a radio without a ballot, angering the modto throw their weight behind the miners with widespread walkouts.

Ron Todd, the transport workers' general secretary, indicated that a "hig bang" strategy was be-ing formulated to block supplies of fuel and raw materials to power stations and steel plants to break the stalemate over the strike.

"We have come to a situation

Police said at least 14 pickets were arrested Monday in clashes outside Scottish mines when they threw stones and paint at buses carrying nonstrikers. Two of the moderates were cut by glass from shattered windows.

The strike was called March 12

Mr. Magee said 40 of the nonstrikers got into the Bilston Glen mine near Edinburgh, a focal point in the strike, which has split the union. "That's the highest number so far in the dispute." he said, "We believe more men will come back in the coming days."

The coal board said 35 of its 176 by the National Union of Miners' mines were working normally where many people believe that it's leftist president, Arthur Scargill, to around Britain, 15 more than last going to require major disruption protest the planned closure of 20 week. Union Ban at U.K. Spy Center Upheld

LONDON (Reuters) — A panel of three appeals court judges ruled Monday that Prime Minister Margaret Thatcher acted lawfully in banning trade union membership at Britain's main electronics intelligence

The decision reversed a court ruling last month that Mrs. Thatcher failed to hold proper consultations with staff and unions before ordering the ban at the Government Communications Headquarters in Cheltenham in western England. The appeals panel held that Mrs. Thatcher's action was clearly "taken on the grounds of national security.

The Cheltenham center employs about 8,000 technicians and translators to monitor Soviet and other Eastern-bloc radio communications. Civil service unions representing workers at Cheltenham said they would take the case to the House of Lords, Britain's highest court of appeal.

Driver Killed in Attack on Kuwaiti

MARBELLA, Spain (UPI) — Gunmen in a moving car sprayed the automobile of a Kuwaiti newspaper owner with submachine-gun fire, killing the driver and wounding another man, police in Marbella said Monday.

A man telephoned the Beirut office of the French news agency Agence France-Presse to say that the attack had been carried out by the pro-Iranian group Islamic Jihad.

The newspaper owner, Khalid al-Marzooq, 51, was not injured in the attack Sunday night in the Costa del Sol resort. Mr. Marzooq's family owns the newspaper Al-Anbaa, which has favored Iraq in the Gulf war. ic edge of apartheid by abolishing legally enforced job discrimination and allowing the formation of care-U.S. Says KGB Sent 'Klan' Letters

WASHINGTON (AP) - William French Smith, the attorney general, accused the KGB, the Soviet secret police and intelligence service, on Monday of forging threatening letters purportedly sent by the Ku Klux Klan to 20 Asian and African nations, in an effort to convince them to

withdraw from the Olympic Games.

In a speech prepared for the American Bar Association convention in Chicago, Mr. Smith noted that in the months before the Olympics opened, we were especially concerned by reports in the press that the Ku Klux Klan had allegedly mailed threatening and abusive letters to some 20 Asian and African countries planning to take part in the 1984 Olympic Games," None of the nations that received the letters withdrew from the

Games in Los Angeles.

Mr. Smith said the letters "were not produced or sent by the Ku Klux Klan. They were, instead, manufactured and mailed by another organiza-tion devoted to terror: the KGB." He said that "a thorough analysis including linguistic and forensic techniques — reveals that they are classic examples of a Soviet forgery or disinformation operation."

4 Sentenced to Death in Soviet Union A confrontation between the left

MOSCOW (AP) — Three murderers in the Kirgiz Republic in Central Asia, who robbed their victims to finance alcohol addictions, have been sentenced to death, according to a newspaper reaching Moscow on

The newspaper Soviet Kirgizia said that six persons connected with the murders in the spring were arrested in mid-April in Frunze, the republic's capital. After a two-week trial, for which no date was given, three were "refused the right to live among people" and were "sentenced to the highest form of punishment — execution," the newspaper said.

In the Lithuanian Republic, a man with three previous criminal convictions was sentenced to death for strangling a woman with the belp of his sister, according to another newspaper. The paper, Soviet Lithuania, said the two strangled a woman and then stole wine, food and money from her. The sister received a 10-year sentence.

India Rejects Joint Inquiry on Attack

NEW DELHI (AP) - India has rejected Sri Lanka's proposal for a joint investigation of the bomb explosion that killed 31 persons at the Madras international airport, a Sri Lankan official said Monday. About 150 relatives of 25 Sri Lankan nationals killed Thursday in the

explosion were to arrive Monday for a mass funeral in Madras, in Tamil Nadu state in southern India. The bomb was hidden in a suitcase, which was destined for an Air Lanka flight from Madras to Colombo.

while still maintaining racial Pakistan Delays Conspiracy Trial

ISLAMABAD, Pakistan (AP) - The trial of 50 persons accused of plotting to overthrow the military government of General Mohammed Zia ul-Haq has been postponed because "the courts are full," a government spokesman has announced.

No new date was set for the trial, but the spokesman said Sunday that it could be within a week. He said the accused were arrested in 1921 and 1982 after "after getting training in Alghanistan in subversive and sabotage activities."

The pro-government Pakistan Times said Sunday that the defendants

were members of the al-Zulfikar group, an extremist wing of the opposi-tion Pakistan People's Party founded by Prime Minister Zulfikar Ali Bhutto. Mr. Bhntto who was executed in 1979.

Experts See Little Change In U.S. Budget Deficits

major reductions. The deficit will

be higher in 1989 than it is now," Some of the forecasting concerns are run by economists who have been identified with Republican administrations and some by economists identified with the Democrats. But both groups consider their work objective and apolitical. And they are sometimes wrong, as all economists were in predicting a tepid recovery for 1983 and 1984 rather than the powerful expansion

they are now witnessing.
Robert F. Wescott of Wharton Econometrics in Philadelphia com-pleted a detailed study of the Mondale proposals last week, Mr. Wescost, relying on his assumptions for growth and inflation in the economy, said the deficit under Mr. Mondale in 1989 would be \$205 billion, as against a Reagan deficit of \$240 billion to \$250 billion.

Mr. Wescott said he expected the covernment's tax revenues to be \$30 billion higher than they are now by the end of a second Reagan term and \$60 billion higher after four years under Mr. Mondale. Miss Eickhoff of Townsend-

Greenspan said that she expected higher deficits under Mr. Mondale because a Democratic administrauon would have more difficulty curbing growth in social programs. .Mr. Mondale has made a dozen specific proposals, the most important in taxation, to deal with the deficits. For people earning more than \$60,000 a year, he would eliminate the third year of the Reagan

tax increase for those taxpayers. He would require taxpayers with in-comes exceeding \$100,000 to pay a 10-percent surcharge on their taxes. Because some husinesses can use

tax cut, resulting in a 10-percent

ability to nothing, he would require

percent on their profits.

Mr. Mondale would also defer tax indexing, scheduled to take effect in January. Indexing was designed to protect taxpayers from paying higher taxes merely because inflation, rather than real increases in incomes, forces them into higher tax brackets.

In spending, Mr. Mondale has proposed that the growth of the defense budget be reduced to 4 percent annually, as against the 6 per-cent or 7 percent expected under no legal obligation to do so. cent or 7 percent expected under Mr. Reagan. While keeping the Medicare and Medicaid health programs intact, Mr. Mondale said he would curb the rise in health care Pressure Brings Brazil

costs, producing \$10 hillion in savings in the 1989 budget.

The Democratic candidate also said he would slow the growth in agriculture programs, saving another \$15 hillion. He also said he would restore some cuts of the last four years in programs for the poor, such as school lunches and food stamps, and would spend \$30 bitlion by 1989 for education, research, and development in an "industrial strategy" program to strengthen industry and the labor

Analysts say that his proposed tax increases would produce only a few billion dollars in added reve-

Mondale, in Radio Address, Presses Issues of Budget and Trade Deficits

By Lee May
Les Angeles Times Service
MINNEAPOLIS — Walter F. Mondale, in a nationwide radio address, has likened federal budget deficits in "a trap door under our economy" and again insisted that President Ronald Reagan would raise taxes to reduce deficits.

[On Monday, Mr. Mondale met with hudget and tax advisers to work out details of his promise to cut the deficit by two-thirds in the first term of a Mondale administration, The Associated Press report-

In a five-minute paid broadcast on Sunday that resembled President Reagan's weekly radio addresses, the Democratic presidential candidate said the "economy is suffering from the largest federal deficits in history." He said the record deficits lead

come by. The results, Mr. Mondale said, are lost markets in agriculture, heavy equipment and high technology, and a loss of three million

> The former vice president supports legislation to require that for-eign companies use a certain perexporter of automobiles.

Mr. Mondale again challenged Mr. Reagan to six debates, saying one should focus on "getting back our country's competitive edge."

Mr. Mondale also continued to press the issue of an income-tax increase, saying that "whatever Mr. Reagan may tell you," taxes must be raised regardless of who wins the election.

Dayton Duncan, deputy press secretary, said that Mr. Mondale planned in tape broadcasts occasionally, but not necessarily weekly. Sunday's message was aired on more than 100 stations, he said.

The possibility that Mondale might consider a radical reform of the income-tax system was raised by his scheduled meeting Monday in North Oaks, Minnesota, with Senator Bill Bradley of New Jersey and Representative Richard A Gephardt of Missouri, authors of the Democratic version of a "flat tax," The AP reported.

[Under their proposal, most deductions would be removed from the federal income tax system and tax rates cut substantially. ("He has endorsed the principles

of Bradley-Gephardt - simplification, doing away with a lot of loop-holes," said Mr. Mondale's spokesman, Mr. Duncan. "But he wants

Herald The Cribune Published With The New York Times and The Washington Post

The Worth of Hong Kong

France's Henry IV once offered a worldly reason for his conversion to Roman Catholicism: "Paris is worth a mass." Just as flexibly, China's Communist rulers have apparently concluded that a thriving and profitable Hong Kong is worth leaving it with British-style courts and Western-style freedoms. Though vital details are still unresolved, the bargain so iar struck on Hong Kong's future does credit

to British diplomacy and China's realism. The two governments now agree that after Britain's 99-year lease on Hong Kong expires to 1997, the colony abutting the Communist mainland will be guaranteed a further halfcentury of capitalist existence. Although they would be living for the first time under the Red flag, the five million inhabitants are assured ninistrative autonomy, including full control over trade and economic policies, free

ravel and the British-designed legal system. With that much settled, Britain's Parliament may get to consider the finished package by October. Three large matters are still to be settled: Who will control Hong Kong's profitable aviation rights? How will property be leased when the Crown ceases to be the principal landlord? And stickier still, what will be the citizenship rights of two million Hong Kong residents holding British passports?

A British passport once guaranteed perma-nent residence in Britain, But now colonials and former colonials, the majority nonwhite. may only visit Britain. Many in Hong Kong fitting that category have fled Communist rule once and may want to do so again. The best measure of Britain's trust in China's promises to Hong Kong would be a willingness to welcome those who have reason to hold doubts.

Beijing may find capitalism easier to tolerate than political pluralism. Hong Kong generates a third of China's foreign exchange, and opens a valuable window to Western markets. The colony was left alone even by Mao Zedong, though he scorned the treaty that created it as "unequal." Even with the future in doubt, Hong Kong has been booming, its exports and imports 50 percent and 30 percent greater than they were last year.

But free trade is one thing, free speech quite another. Hong Kong has been ruled by a British governor, but an elective system is soon to be established. Precisely how the colony would govern itself while also becoming part of China is yet to be defined. That small print needs scrutiny before Britain's skill and China's good faith in this anomalous but welcome agreement can be fully judged.

- THE NEW YORK TIMES.

IBM and the Europeans

The European Community has abandoned its antitrust case against IBM with only modest concessions from the company. International Business Machines Corp. presents a genuine dilemma to convendonal annitrust poicy, in the United States as well as in Europe. It is a very big company, and dominant in its industry. It does not treat its competitors gently. But it is a highly productive source of a technology that all industrial countries consider crucial to their economies.

In the United States, the Justice Department carried on antitrust litigation against BM for 13 years before finally giving it up in 1982. As it has worked out, the issue seems to have been resolved by the reorganization of the telephone system. The new American Telephone & Telegraph Co. is now free to go into the computer business, with the immense resources of the Bell Laboratories behind it. As computer and communications technologies increasingly overlap, there is a good prospect for the most useful kind of competition be-

tween two extremely strong companies.

But the 10 countries of the European Community have no AT&T. Each has its own government-operated phone system. And IBM has two-thirds of the West European market for large computers. Of the oext six compedtors, four are American; the two Europeans ere Siemens AG and CII Honeywell-Bull, respectively West German and French. None of them has so much as a tenth of European sales. The theory of the European Community is that the 10 countries together constitute an economic base large and rich enough to support companies matching the Americans in scale and technology. But the theory has not worked in the field of computers, among others. Because the Europeans know that the field is essential to industrial development, each of the larger countries' governments wants its own company under its own flag. The result is that none of them has been able to acquire the scale or momentum to challenge IBM.

As the antitrust case proceeded, the Europeans began to fear that if they pressed too hard, IBM would withdraw some of its production and perhaps delay the introduction of advanced products in their countries. IBM is an important employer in Western Europe. That is why the European Community has oow suspended the case merely with a promise from IBM to open design information to its European competitors within four months of announcing a oew product.

Nothing in this settlement will affect IBM's enormous share of the European market. That is the price that the West European governments are evidently willing to pay to maintain a fragmented market in which oooe of the major countries is willing to see its own computer company disappear.

—THE WASHINGTON POST.

A Medal for Wall Street?

The U.S. financial markets seem to have been caught up in the Olympic spirit. Stock prices accelerated upward all of last week, and the volume of trading on the New York Stock Exchange set successive records oo Thursday and Friday. It echoed the kind of thing going on in the swimming competition in Los Angeles. A gold medal for Wall Street?

The oumerologists of the financial world will note that this remarkable week fell a few days short of the second anniversary of the great stock market boom which began on Friday, Aug. 13, 1982, and ran more or less steadily unoi late last year. In both cases, the immediate trigger was the Federal Reserve

Board's midyear review. In the summer of 1982, because Congress was passing a tax increase, the Federal Reserve was able to relax its very tight grip on the money supply. After watching interest rates crop sharply for six weeks, investors decided that the world really had changed and the stock market tonk off. This year, after carefully observing the aftermath of the Federal Reserve's July meeting and listening to its chair-man, Paul Volcker, testify before Congress, investors have evidently decided that at least he does not intend to go out of his way to raise gates. That counts as good news, and once again the market is responding.

To the extent that these investors expect business profits to keep rising smartly over the coming year, they are probably right. But to the extent that they expect stable or falling interest rates, their assumptions are far more speculative. At a time of heavy borrowing throughout the economy, and increasing reliance on a flow of foreign money to sustain it, interest rates are going to be unpredictable. The chances are greater that they will rise in the year ahead than that they will fall.

The most striking thing about the enormous volume of stock being traded is the illustration of the power of the computer lo transform the financial markets. In the late 1960s and early 1970s, some brokerage firms literally collapsed under the pressure of increased trading. They could not handle the paper fast enough. Today the numbers of shares routinely traded is six or seven times as high, and there is very little paper to handle. Tied together by phone lines, the computers now constitute a worldwide network of continuous trading. That is good for the markets, and probably good for the economy. But it permits very rapid movement of very large amounts of money. The result is the dramade volatility that the markets demonstrated last week - volatility, this time, in the right direction.

- THE WASHINGTON POST.

Other Opinion

Praise for a 'Flawed Genius'

The phrase "flawed genius" might well have freen invented for Richard Burton. On the one hand, there was that volorgettable voice, gritty with the overtones of his native Welsh valleys and, in his final moments, a riveting presence on stage and s. n which would reduce other performers to mere shadowy puppets. But

there can hardly be a newspaper reader in the Western world who is not aware of the other side of the coin. For like so many men of enormous talent - rarely in Burton wholly realized - be was dogged by irredeemable weaknesses. That said, it would be an ungenerous heart which did not acknowledge that the world would have been duller without him. - The Daily Mail (London).

FROM OUR AUG. 7 PAGES, 75 AND 50 YEARS AGO

1909: Kitchener's Mediterranean Post LONDON - Lord Horatio Herbert Kitcherer has accepted the position of High Commissioner and Field Marshal commander-in-chief in the Mediterranean. Lord Kitchener, the "Morning Leader" says, will first proceed to Japan to represent the King and the British army at the grand maneuvers next November. From there, at the requests of the Governtrents of Australia and New Zealand, he will visit the Commonwealth and Dominion to inspect the troops and to advise as to the best way of giving effect to certain proposals for the cevelopment of their military forces. Afterwards Lord Kitchener will come home and

take up his new command.

1934: Early Church Found in Rome

ROME - Papal archeologists have uncovered under the Church of St. John Lateran the remains of the first Christian church in Rome and the first residence of the popes. The Lateran Cathedral still ranks as the mother church of Christendom. It is the traditional Episcopal See of the Pope as Bishop of Rome. The discoveries were made when repairs to the floors at the lowest level of the church, which contains oumerous crypts, were under way: As workmen dug for new foundations, they struck a wall. Fourth-century masoury, which venfied the original outline of the walls, was unearthed. Papal archeologists had searched for years for the earlier church's foundations.

D AMASCUS—"The great military pressures, the situation in Lebanon, particularly the Israeli invasion, have created great pres-sures on the Syrian economy," said Hiram Mutewalli, acting governor of the Central Bank of Syria. "Our problem now," he added, "is to have peace so that we can organize our economy. If not, we will have to go with the wishes of Moscow, the United States or even Beijing."

In a series of interviews, senior economic figures in the Syrian government returned frequently to the theme of peace and its relationship to Syria's economic future.

"We want to reduce our defense spending," said Kamal Sharaf, the minister of state for planning affairs. "I wish to emphasize my posi-tion that if we were not in confrontation with Israel, we would use this money for social expenditures.

The more we feel the Israeli

threat is reduced," he added, "the more we can allocate for the benefit of the Syrian citizen."

Defense spending comprises an amazing 56 percent of Syria's 1984 current accounts budget and 30 percent of the total government budget. Mr. Sharaf pointed out that defense costs have increased three-fold since 1978, while Arah aid has decreased by the same proportion—to an expected \$1 billion to \$1.4 billion for 1984. Saudi Arabia is the only Arab country that has consis-tently honored the 1979 Baghdad commitment to help Syria in the ongoing confrontation with Israel. Syrian officials also indicated that President Hafez al-Assad

wants to cut our material obliga-dons in Lebanon, not only our military presence but our support for certain factions." Sources close to Mr. Assad said that the 1982 confrontation with Israel cost more than \$1 billion, and that military spending in Lebanon still averages \$250,000 per day. By Joyce R. Starr

Smuggling of imports from Leba-non, initially tolerated and even encouraged as a channel for consumer goods, has become an additional burden for Syrian government coffers. The illegal trade has grown to absorb about 10 percent of legal revenues and created a public obsession for foreign goods that

threatens local industries.
While still far from crisis proportions, strains on the economy are nonetheless widely, and worriedly, discussed here. Foreign exchange shortages have plagued Syria for years, but currency reserves are now at a low of about \$600 million. The 1984 inflation rate is expected to be 13 percent to 15 percent, about double last year's rate.

Syria's foreign debt is still rela-tively minor, \$2.3 billion, and government authorities claim it is owed entirely to foreign governments at concessional rates. But this does not account for Soviet military loans — \$2 billion since 1982 and \$12 billion to \$13 hillion since 1973 — as yet repaid only in bartered goods. Imports were reduced in 1983,

bringing the current accounts defi-cit in the balance of trade to \$509 million. But declining oil prices bode ill for crude oil exports, Syria's dominant source of foreign earnings, while the world recession has badly hurt other key exports such as cotton and textiles. "Our businessmen know what's happening to the American interest rate," said Mr. Mntewalli, the Central Bank official, "oot just in the morning, but every two minutes."

But dry statistics only partially explain the readiness of government officials to talk about the diversion of military resources for social development. Although the Assad regime has finally achieved its longcoveted recognition as a major political power in the Arab world, the Ba'ath Arab Socialist Party is increasingly aware that it cannot afford to ignore social promises made to its constituency.

Political oppression may be an effective substitute for genuine legitimacy in the short-run, but economic oppression — of the agrari-an-based Alawites in particular, but also of the growing proportion of rural workers who have migrated to the cities - is more dangerous, and violates the ruling party's tenets.

The deterioration," one Syrian businessman confided, is now so obvious that the president himself is taking charge."

The socioeconomic pressures facing Mr. Assad are far from insignifi-cant. Syria has the highest birthrate in the Arab world. Seventeen percent of the population is under the age of 4 and 41 percent is between 5 and 19. The literacy rate has been raised under the Assad regime but to maintain it will be difficult with the current birthrate.

Per capita income in Syria is fairy low, about \$1,500, and many people hold several jobs.

The 1963 nationalization and the

launching of many large but im-practical industrial projects have also hart the economy, diverting re-sources from the agricultural sector, drawing rural dwellers to the city, and inspiring a work ethic in which decision-makers "did what they wanted, because no one was going to ask how much money was being lost," as one Syrian said.

Typical of the stories going

around - many of which may be apocryphal - is that of an expenbuilt paper factory that has sat for six years only partly opera-tional "because it costs more to import the raw materials than to pay the employees to do nothing."

Yet President Assad is rarely. blamed for these mistakes. Instead, the criticism is leveled mostly at his

Hafez al-Assad advisers. But whether he can now redirect the economic ship of state on a stable and productive course is

leading question here. Military parity with Israel and preparedness against "the ever-pre-sent Israeli threat" are no less imperative to the man on the street than they were 10 years ago, and have even been amplified by the Lebanon experience. But when se-nior officials mention the economic benefits of peace, they appear to be reflecting a subtle, but important, political turning point in the ongoing Syrian drama.

Our president is a patient and

determined man," said Mr. Sharaf, the planning minister. "Therefore, if we are forced to continue building our defenses against Israel, we are prepared to do so. But we would rather go in the opposite direction."

I do not want to overstate my

ing the 10-year effort launched in 1974 to eradicate hunger and malnutrition, the council's ministers found that the world provides food for a billion more people now than then, but that the chronical ly malnourished still oumber at least half a billion. Moreover, it is clearer now that hunger is both a natural and a man-made phenomenon. As the council's report observed, "Human error or neglect creates it, human complacency perpetuates it,

The natural roots of hunger are evident in northern Ethiopia, an area that has been prone to drought for centuries. Man-made phenomena,

bowever, complicate the current drought.
"In Korem," a government relief official explained, "people have used the land for centuries.
Without rehabilitating the land, you can't expect sufficient food to be produced."

Population pressure, overgrazing and deforesta-tion have taken their toll. The suffering reflects oot only a dearth of natural resources but also a poverty of human resourcefulness.

Hunger in Ethiopia, as elsewhere in Africa, is also a product of civil intest. Secessionist stirrings complicate the difficulties of food production and distribution. The government is assisting refugees fleeing from neighboring countries while at the same time seeking to repatriate Ethiopians from outside its borders. Of the world's 10 million refugees, half are in

Africa - some reasonably self-sufficient but others dependent on governmental and private aid. Ethiopia's ability to address its human agenda is scriously undercut by international economic fac-tors largely beyond its control. Describing food shortages as "the more visible part of a deeper economic crisis," the World Food Council's ministers noted the devastating effect on African countries of "adverse external forces, including the global economic recession." Ethiopia's coffee and other export earnings are down; no commercial food imports are planned this year.

East-West tensions also take their toll. Ethio-

pia's Marxist government flaunts its solidarity with the Soviet Union, which along with Cuba has provided military and technical assistance. But

Ethiopia's best food production is on individual plots rather than state farms, and peasant associa-tions and the government get generally high marks for self-help development efforts.

Given the multiple causes of hunger, it is small wonder that governments have difficulty acting in concert to address the problem at its roots. Selfreliant national food strategies are more easily designed than implemented. It is easier to send, and receive, food aid than to tackle the paradox of structural food surpluses in many developed coun-tries and structural food shortages elsewhere. The U.S. response to the African food crisis has

been uneven. As African governments address the urgent task of putting their economic houses in order, U.S. aid, which has risen substantially in recent years, places undue emphasis on the private sector and on security considerations.

Although multilateral organizations have acitted themselves well during the decade, the current U.S. penchant for bilateralism is undercut-ting the important work in Africa and elsewhere of agencies such as the UN International Fund for Agricultural Development and the World Bank's International Development Association. In short, the United States is an increasingly fickle partner in the international food effort in Africa.

The situation in the camp at Korem, with its daily death toll now in the dozens, is the result of decades of neglect. The future bolds more of the same unless the world acts on what it has learned since 1974, when, in a show of bravado, we gave ourselves a decade to end hunger.

The sight of a dying woman lying motionless, or a child covered with open sores, makes the visitor recoil with shock. The next reaction is to redouble efforts to accelerate the flow of emergency food and medicines. But the problem is larger than Korem. It also demands rekindled commitment by the international community to fashion a global food system that protects the well-being of all the world's people.

The writer heads the Office on Development Policy for Church World Service Lutheran World Relief in Washington. He attended the World Food Council meeting in Ethiopia in June and contributed this comment to the Las Angeles Times.

Environment: Optimism Grows Among the 'Haves'

By Ann Crittenden

WASHINGTON — Ten years W ago, meetings of environmen-talists tended to be gloomy occasions, dominated by talk of "running out"

of basic resources.

There is still plenty of concern, but a cautious optimism is creeping into the discussions. One barometer of change is the 1984 report on the glob-al environment by Worldwatch Insti-inte. Lester Brown, the institute's director, has been a leading Cassandra, warning of the steady depletion of fuel, topsoil and other resources. Now he sees a more mixed picture.

Indeed, high oil prices in recent years have shattered the link between economic growth and energy con-sumption, and proved that the pricing mechanism can stimulate more efficient use of scarce resources. Since 1974 growth in several developed countries has increased by as much as 20 percent, while energy

mption has remained stable. Meanwhile, 12 countries had achieved zero population growth by 1983. All were in Europe, but other states, such as Singapore, China and Cuba, have made lunge strides.

And supplies of non-fuel minerals are now expected to be more than

adequate for expected demands.

Such gains must be measured against the lingering problems: toxic wastes, acid rain, destruction of forests. Moreover, much of the progress in halting environmental degradation has come in industrialized countries, while poor nations still struggle to reconcile the need to improve living standards with the need to preserve their environments.

skill that is not obsolete is under-An episode at a recent conference standing of nature, especially hu-man nature. And most of the exin Maryland of the World Resources Institute highlighted the discrepancy between many Western approaches and the realities of the developing Washington Post Writers Groun

world, it involved a paper presented by Peter Rogers, a Harvard professor of environmental engineering. His report concluded that there is

no global shortage of fresh water and will not be until well into the 21st century. He acknowledged that se-vere shortages do exist in some areas, and he said conservation measures (such as pricing water to reflect its scarcity) might be one answer. But the report also questioned whether the benefits of achieving the

UN goal of clean drinking water for all people by 1990 would be worth the huge cost, since factors other than unsafe water also affect the health of people in the poorest nations.

Afterward, Mohamed T. el-Ashry, a staff member of World Resources

originally from Egypt, pointed out that a pricing strategy would not get very far among Moslems, whose reli-gion forbids charging for water. And then Jacqueline ki-Zerbo of

Bourkina Fasso (formerly Upper Volta), spoke. "We need water," said in a quietly emotional voice. "I see the women digging in the sand to grow a few vegetables, and I see the wells too dry to moisten the crops. And I don't hear you tell me how we are going to do it."

As il turned out, some participants suggested effective, practical ways the water problem could be attacked. But when Western participants re-verted to their technical discussion of "closed loop systems" and "realistic pricing," another Third World repre-sentative, in a whispered aside to a neighbor, had this comment: "Only the will of people can bring about change. There has to be the will."

The contributor, a writer, wrote the article from which this is excerpted for The Washington Post

In Israel, The Right Message

By William Safire

ERUSALEM - Don't believe the J guff you have been hearing from defeated dows in Israel and disap-pointed liberals in the United States about what they claim is the failure of Israel's voters to choose a direction for their country.

The Israelis seemed to have every

incentive to reject the policies of the right: galloping inflation, dissension about the war in Lebanon, the retirement of Menachem Begin, and the exhortation of a media eager for the triumph of Labor's Shimon Peres.

Despite all these pressures, most Israelis refused — for the third time in a row — to turn back to Labor, disking h Instead, the voters sent the message to the politicisms that the leadership offered by both message and the politicisms that the leadership of the politicisms that the leadership of the politicisms that the leadership of the process are the politicisms. offered by both major parties was unacceptable, and that the politicians should choose a government of all the parties to get the nation together.

Sources who predicted this unex-

read the mood of the country and of the armed forces after the war.

What was needed was precisely what happened: Israelis gave a kick in the teeth to the Old Order, to both the government and its opposition, Now a chastened Shimon Peres has met with the Likud's lame-duck leader. Prime Minister Yitzhak Shamir. Whether they will divide up offices and waste time wrangling until new elections, or use the respite to heed

the people's voice, is unclear.

To the limping left, that Israeli voice is saying: Cut ont the handwringing about a "Vietnam syndrome" after Lebanon; although most generals voted with Labor, the privates went 55 percent to 45 percent for the Likud. Stop negotiating with phantoms over the West Bank and start dealing with the rights of -Arab Israelis. Stop blaming an erosion of Labor support on the new political clout of Jews from Arab lands, and wake up to the hardening of Labor's political arteries — eight of the Likud choices for the Knesset are under 40 years old, compared to

one of the new Labor members.

To the rigid right, the voters are saying: Stop relying on your religious party connections to form a government and start reaching out for biggest party status. Recognize that Israel's greater danger now is economic weakness, and that the Begin-Shamir government was too fearful of unemployment to deal with inflation, for which it deserved to be rejected.

To both parties, the voters' message should be clear. Use this time for economic austerity leading to re- - = ... covery, and no one side will be ablamed for the necessary pains such austerity must entail. Beyond that, both parties must pick better candi-....

dates for the next campaign.
Personalities count. Mr. Peres tells me he plans to choose "a government :---of wide shoulders, to bear a heavy burden." Obviously Yitzhak Rabin, the former prime minister who turned out to be Labor's most effective campaigner, will be important to ...

such a "ministry of all the talents."
In the Likud, behind Mr. Shamir stand Moshe Arens, David Levy, and Ariel Sharon. There is talk of the dreaded Mr. Sharon for the Finance Ministry, because his opponents hope he would dig his political grave while getting the tough job done. Another possibility for the role of Dr. Gloom is Ezer Weizman.

The game of musical chairs will get the attention here this week, but the underlying story is the posters do-grudging response to the voters do-mand for a deep breath and a new start. Labor's leader has been forced start. Labor's leader has been forced underlying story is the politicians'

start. Labor's leader has been forced to offer to share power with his strongest rival and the Likud cannot honorably refuse that offer. The splinter and religious parties will no longer wield mordinate power.

On the eve of Tishah-b'Ab, the Burn liveral anniversary of the destruction of the anniversary of the destruction of the foes have been given the historic role of reconstructing Israel's stability. They will come together to share the unpopularity, and will then step aside for a return to healthy partisanship. for a return to healthy partisanship. The New York Times.

LETTERS

On the Horse-Killing

As one who is about to emigrate to Australia I read with horror the July 26 report "Plan to Shoot 300,000" Wild Horses Begins in Australia, Drawing Protest."

Why was the program never offi-cialy announced by the government of Queensland state? Was it because the evidence that the horses might transmit disease to cattle proved inconclusive? Assuming the slaughter is necessary, did the government consider more effective and humane alternatives than shooting horses from elicopters:

Finally, does the Queensland government not distinguish between the horse and other targets of occasional "culling" such as kangaroos, deer and badgers?

DORINDA N. HANCOCK

London.

What About Reagan?

Sources who predicted this unexpected outcome two months ago now tell me that the voters' refusal to give power to either side could not have been more timely. The rightist Likud had failed to hite the bullet on the economy; and dovish Labor had misgrand the more of the country. n natherwise الوالدائة فيوسان العاء وسيد.. أعما أصد . * أوداليه وجهرو الكونات وتوسقها وا

"If we shy away from a 5 P.M. Limited measures to curtail overscheduling and help cut congestion are now being studied by the Federal Aviation Administratakeoff, others won't, and they'll gobble up the prime-time busi-

U.S. Airports Troubled by Flight Delays

Alfred E. Kahn, the former Civil Aeronautics Board chairman who was the main force behind airline cut flight delays. "We should raise landing fees for

planes in busy hours," Mr. Kahn said, and charge higher fares. The result, he contended, would be fewer flights at those hours and more flights in off-hours, when fares would be cheaper.

Airport congestion has been a periodic problem since at least the late 1960s. But the public frustration has been more acute in recent months because of the abrupt the likelihood of its occurring is worsening of delays this year. For the first six months of 1984.

the number of delayed flights, defined as those taking off or landing 15 minutes late, was 73 percent higher than for the same period a year ago. The total number of flights was up about 10 percent. As of Thursday, about 230,000 of around four million flights had been delayed.

The FAA has oot calculated which airports are most affected by overscheduling. But officials said the worst six probably are La Guardia and Kennedy in New tion, and the industry appears York, O'Hare in Chicago, and the to be made public soon.

ness," said Jerry Cosley, a spokes-more willing to cooperate than it main airports in Denver, Atlanta man for Trans World Airlines. bas in the past. and St. Louis.

Air traffic experts said the delays are no worse than at the end of the 1960s. They said the big difference deregulation, said his free-market is that passengers think the delays philosophy could be extended to are worse because they take place on the ground, at the departure airport, rather than circling near

the plane's destination. "Many passengers don't understand the philosophy of taking delays on the ground," said Frank Bombace, manager of the La Guardia control tower. "Psychologically it seems worse. But it's safer this

East-Bloc Swimmers' Absence Key to U.S. Medal Dominance

By Frank Litsky New York Times Service

LOS ANGELES - When the Olympic swimming competition ended Saturday night, two conclusions were obvious.

First, the United States won far more gold medals and total medals than any other nation. And second, that domination would not have been the same had all the Soviet-bloc nations: Had the East German and So-

viet swimmers been present, the only difference in the men's competition might have been two fewer gold medals for the Americans. Vladimir Salnikov of the Soviet Union probably would have won the 400-meter and 1.500-meter freestyles. As it was, U.S. men won 9 gold medals and 6 silvers in 15 events. The women's outcome surely

would have been far different The Americans won 12 gold medals (2 in a dead heat) and 7 silvers in 14 events, a numerical domination greater than that of the American men. But in this case, the numbers lie. Had the East German women

been here, they and not the Americans might have won all those gold medals. The only Americans who fig-

ured to have a good chance to win golds would have been Mary T. Meagher in butterfly events. Tracy Caulkins, in the individual medley and Tiffany Cohen in

Each won two individual gold medals, and Meagher probably would have won them in any

Olympics on Television

case. Canlkins and Cohen would have faced more difficult battles. swimming. One test of the quality of competition is the winning times. In that respect, the men fared well

and the women did poorly.

In the men's competition, world records fell in 10 events and the Olympic record in all but one. The only Olympic record that survived was Salnikov's 1980 performance in the 1,500meter freestyle.

every world record survived and only five Olympic records fell.

Don Gambril, the U.S. head coach, is normally a placid man. But after the final race, when he was asked when Americans would catch up with the rest of the world in certain events, he became testy.
"Why don't you look at the

In the women's competition

events where we are doing well?"
he said. "This was a strong United States team and it did well." That much is true. It is also true that this team will never exist again because so many of

its stars ended their swimming careers here. The retirees include Rowdy Gaines, Steve Lundquist, Nancy Hogshead and Canlkins.

- All were members of the team that probably would have dominated the Moscow Olympics had the United States not boycotted. All stayed in swimming for another chance at Olympic glory, and all succeeded.

Among them, including relays, they won 11 gold medals and a

In almost every case, the post-

collegians are saying goodbye to

Of the four U.S. men who swam on the team that broke the world record in the 400-meter medley relay, two (Gaines and Lundquist) are retiring and two (Rick Carey and Pablo Morales) will continue to swim.

Of the four who swam on the team that broke the world record in the 800-meter freestyle relay, two (Jeff Float and David Larson) will retire and two (Mike Heath and Bruce Hayes) will continue.

The stars of Olympic men's swimming were Michael Gross of West Germany and Alex Baumann of Canada. Each won two gold medals

and broke two world records. Gross also won two silvers, one in the 800-meter freestyle relay. In that exciting race, although Gross swam the fastest relay leg ever, Hayes held him off by four one-hundredths of a second about 3 inches.

That U.S. relay team is reaping an unexpected reward. The four men — Heath, Larson, Float and Hayes - flew to New York Sunday to pose for a photograph for the cover of Vanity Fair magazine. They will be joined in the picture by Raquel Welch

When the invitation arrived, the four swimmers were delighted. Heath was also apprehensive. "I don't have money for a

plane ticket," he said. "They're paying for the works," said Float. "You're in the big time now."

Edwin Moses winning the 400-meter Olympic hurdles final.

Racing Into History

By Dave Anderson New York Times Service LOS ANGELES — Soon after Edwin Moses breezed through his irst qualifying heat in the Olympic 100-meter hurdles last Friday, he was asked if he ever thought about osing, "No," he said, "I haven't."

No reason be should. Even beore he won his Olympic final Sunlay night. Moses reigned as the nost dominant runner in track hisory. He has now won 105 consecu-ive races in the 400-meter burdles, neluding 90 finals. He had not lost since Aug. 26, 1977, in West Berlin when he finished behind Harald schmid of West Germany, a year be a record for a runner in any one after having won the Olympic gold event.

who lives now in Laguna Hills, or her best that particular day. Calif., after having grown up in Dayton, Ohio, apparently not only second chance. Either he was his foesn't think about losing, but also race or he doesn't. And for nearly locsn't even remember what it was seven years, he has always won. ike to lose. In addition to his . For his Olympic semifinal late treak, he has set and reset the Saturday, Moses appeared in his Retton had already made off with vorld record four times. With his blue 1184 Moses appeared in his Retton had already made off with ime of 47.75 seconds Sunday light, he holds 13 of the 19 fastest imes, having broken 48 seconds 28 imes; only three others have done t a total of five times.

o win the same event eight years the eight runners.

Nurmi won the 10,000-meter run it Antwerp, Belgium, in 1920 and von it again at Amsterdam in 928: in between, in 1924 at Paris, nother Finnish runner, Ville Riola, won the 10,000 after having worken Normi's world record six · · · · vecks earlier. Because of his rival's nd the 5,000 by his country's Hympie officials. Peeved, he won oth. But he did not run in the 0.000.

No runner has ever won the same vent in three consecutive Olym-· rics, but if it had not been for the J.S. boycott at Moscow in 1980, 4oses almost certainly would have o achieve that unprecedented tri-

vorld's consciousness immediate-y, as Muhammad Ali did in boxag, as Carl Lewis is doing as an Dympic sprinter and long jumper. Others need more time. Moses was ne of those who needed more ime. Ton much time.

Even as his streak mounted in its arly years, Moses was virtually igored, the public being either unrilling or unable to see the man ho often competed with sunglasss to shield his sensitive eyes. But ith the approach of the Olympics nd with the memory of his having else, assumed he would win for his no with the methody of his having on his race despite an untied lace olympic gold medal.

Moses doesn't think about losapping on his left red shoe in the orld championships at Helsinki

last year, he has emerged as one of the symbols of these Summer

Hurdling has been an Olympic event since the resurrection of the modern games in 1896 at Athens, but Moses has projected it as never before. In the 400 meters, he skims over 10 burdles, each 36 inches high, each 13 strides apart — at least for him. Other hurdlers require 15 strides, but with his long legs, the 6-foot-2-inch (1.87-meter) Moses is a born burdler, the best the world has ever seen at 400 meters over those 10 burdles.

His winning streak is believed to

Iolanda Balas, the Romanian When he was asked recently if he high jumper, won in 140 consecu-emembered how he felt when he tive meets, Parry O'Brien, now in igo, Moses replied, "No." Quietly, had 116 consecutive victories in the shot put. But both competed in In the majesty of what he has field events, in which a competitor eccomplished, 28-year-old Moses, has several opportunities to do his

As a hurdler, Moses doesn't get a

world record four times. With his blue USA warmup suit, his body jiggling as he moved toward the No. 3 box identifying his lane. Soon he took off his blue jacket and dropped it into the little white shopping basket with his lane numt a total of five times.

By winning the final, Moses ber on it. Several minutes earlier, oined Paavo Nurmi, the Flying eight girls had marched ont onto inn of more than half a century the track, each carrying a basket so, as the only Olympian runners with a lane number on it for each of

Around that same time, four yel- mate, Simona Pauca, on the ballow flatbed carts had hauled the 80 burdles, 20 to a cart, around the track to be placed precisely by the officials in their yellow blazers, where Julianne McNamara of the gray slacks, white sneakers and white straw hats with pink hat-

With the Spirits High and Costs Low, Games' Private Gamble Is Paying Off

By Robert Lindsey New York Times Service

LOS ANGELES -- The Games of the XXIII Olympiad are only half over, but evidence is growing that compared with that," he said. private enterprise bas succeeded in pulling off what According to Ueberroth, the only government has done before.

for bigger things to go wrong. But the prevailing view among many participants is that the gamble by Los ment help? Angeles to stage the first Olympics organized, financed and managed by what bureaucrats and econo-receive from ABC for U.S. and Canadian broadcast mists call "the private sector" — business and others rights (the final \$15 million payment is still in negotia-outside government — has already been won.

"There is no way we won't have a surplus," says Peter Ueberroth, president of the Los Angeles Olym-tions from corporations and millions more for TV pie Organizing Committee. The committee of business rights in other countries. people agreed to stage and finance the Games in 1978 block attempts to tax them for the Olympics. There are other indications of success

Los Angeles is on an Olympie high. After years in which it was fashionable for Californians to scoff at the Games as a nuisance and a raid on the public treasury, a sense of euphoria is gripping much of the

city.

Some of the high spirits have undoubtedly been generated by a sense of relief that Olympic-size traffic ams, congestion and other problems that had been forecast for years have so far failed to materialize. Some of the euphoria is probably a reflection of the patriotic pride generated by the strong showing of U.S. athletes in the Games, their number of gold medals increased by the absence of competitors from

14 Soviet-bloc countries. But there is also a sense of satisfaction that Los Angeles — by using existing facilities for most Olympic needs, by recruiting thousands of volunteers to cut labor costs and by raising more than \$350 million from corporate sources — has demonstrated that cities elsewhere can arrest the soaring costs of hosting Olym-

One can argue that the Los Angeles Games are "commercialized." There is an official sponsor for this, an official sponsor for that. Companies feud and sue each other over which has the right to print the

pic Games.

But in an epoch when Madison Avenue's influence seems worldwide, with the exception of some Communist countries, the commercialization here does not seem all that intrusive. And it merely reflects the reality of the growing commercialization of sports in general as a result of the economic power of television. More than I million people have already seen the Games in person; more than 2 hillion are expected to

People may still revere the values of the Olympic amatuerism of ancient Greece or Victorian England, will never be the same after Los Angeles. But now, as much as anything else, the Olympic Games are a giant TV show.

watch them on television.

U.S. team. With a typically grace-ful performance, she joined MeNa-mara and Retton as pioneering year to him from commercial endorsements.

million for the Games, and corporations also paid a for future Games,

lot," Lewis answered. "And I heard a rumor that there will be millions left over." "I think what we're talking about is minuscule

According to Ueberroth, the cost of mounting the nly government has done before.

Olympics will total about \$497 million — about 5

Not everything has gone perfectly. There is still time or bigger things to go wrong. But the prevailing view How did they pull it off with virtually no govern-

Besides \$225 million the committee is scheduled to more than \$115 million in cash and other contribu-

Ueberroth guards details about the LAOOC's finances like a professional cardplayer protects his hole card in a high-stakes stud poker game. Publicly he says he expects a surplus of about \$15

million when the Games end Sunday. The money is to be used for subsidizing amateur sports activities. But there are some informed observers, doing their own arithmetic, who have speculated that the surplus may end up a lot larger than that. These same observers also question the committee's

claims of a "tax-free" Olympics. Congress appropriated \$50 million for possible federal costs in the Games, and the police officials in several communities claim they are not being reimbursed adequately for their added costs of providing security. But taxes from economic activity generated by the

Olympics will probably offset much of that cost, and there seems little doubt that the 1984 Games, with the help of private business, will cost less to taxpavers than any Olympics in recent history. In offering to conduct the Games with little govern-

ment money, the organizers knew they would have access to publicly owned Los Angeles Memorial Coliseum, site of the 1932 Games, the Rose Bowl in Pasadena and other facilities that would have cost hundreds of millions to build.

They also searched for miles around to find additional facilities that could be adapted for the Games Another key to the organizers' success was their recruitment of about 50,000 volunteers, saving millions in wages.

"We've got hank presidents serving as ushers, women with huge diamonds on their fingers - 650 volunteers," said Robert Caughran, manager of the water polo facility at Pepperdine University. "They want to

he part of a great happening." Volunteer Joyce Dietz agreed: "It's a once-in-alifetime thing for all of us."

There's a perception here that the Olympic Games

But now, as much as anything else, the Olympic
Games are a giant TV show.

Some have suggested that the most lasting contribution of the first Olympic Games managed by husinessmen instead of bureaucrats may not be learning how asked at a news conference if he was troubled by to save money, but how to raise it. It took businessmen to realize how valuable television rights to the Olympics bad become, pushing ABC to bid \$225 million for the rights (more than three times its bid for the "I think ABC paid in the neighborhood of \$225 Moscow Games) and beginning an escalation of rates

ARTS/LEISURE

A Robot Sings, Plays The Piano

By William E. Schmidt New York Times Service

ATLANTA — Not so long ago, robots were mostly found in factories, faceless machines with spindly arms that did the work of real people, twisting bolts on as-sembly lines and welding metal to metal.

But now Warner Leisure Inc., a subsidiary of Warner Communications, has installed a fully animated robot, a lounge singer, in a bar in a suburb of Atlanta.

"You remember World War II." says the molded fiberglass figure called Sammy Sands, an oversize, cartoonlike character who sits behiod a piano. "It was in all the newspapers." A pack of cigarettes. a dirty ashtray, a half-finished manhattan and a jar for ups are arranged atop the piano, a non-

functional prop.

Once each hour at night and several times during the day, Sammy performs one of six 12-minute-long prerecorded sets of jokes and music. Wearing a silver lame jacket and bow tie undone at the neck, he sings, plays country-and-western arrangements of hits and winks at the audience. The music and jokes are all on a reel-to-reel tape, activated by bar employees, and although Sammy's hands and mouth move, the sound comes from a speaker behind the robot.

The audience generally treats Sammy Sands as they might treat most real-life lounge singers: few pay him any attention, and almost no one applauds, even though Sammy ritually thanks everyone any-

A Rare Puccini Performed in Italy

By William Weaver

for their museum, the trustees, MONTEPULCIANO, Italy — Studiously avoid-working out of a small office at the ing the term "festival," this lovely Tuscan town Seamen's Church Institute on State calls its annual program of plays, opera, concerts, and Street in lower Manhattan, have other events a contieri, or workshop. But while it assembled a remarkable collection certainly has a serious, purposeful spirit, the workshop also has its festive aspect. For just about a month from early July to early August, the streets are decked with flags, local wine growers offer visitors free samples of their renowned vino nobile, and the neighboring villages put on fairs featuring the gastronomic specialities of the area.

This year's workshop was dedicated to the theme of peace (a performance of Britten's "War Requiem" of the "Gremlins," and Richard brought the muscial activities to a close on Saturday); Donner, who directed "Superman: but the theme was broad enough to allow a wide range brought the muscial activities to a close on Saturday); The Movie," will collaborate on a of offerings. group assembled for the occasion, played remarkably well. The string section, in particular, showed an admirable crispness of attack, with the mellow sound the score demands. Jan Latham-Koenig conducted with tactful sensitivity (though both his players and singers were occasionally too loud for the small Teatro Policiano). The outstanding member of the cast—and the only Italian—was the baritone Gianluigi Senici, who has not only a warm, lyrical voice but also clear enunciation. As Fidilia, Zsuzsanna Denes displayed an ample instrument, still only partially controlled. She delivered her two last-act arias feelingly, however, and deserved her applause. Raimundo Mettre, in the title role, did more shouting than singing; and Helrun Gardow, the Tigrana, sprawled vocally as well as physically, not belped by an absurd hairdo or by Lorenzo Mariani's staging. Raoul Farolfi's set, a Victorian Gothic structure of arches meant to look like cast iron, was handsome, but not always appropriate.

This rare hearing of "Edgar" not only proved the opera to be enjoyable, but also suggested that a renewed, scholarly interest in Puccini's music is

Further evidence is the Congress of Poccini Studies scheduled this month at Torre del Lago, where a festival will also present the composer's very first opera, "Le Villi,"

FUTURES AND OPTIONS

Young Markets Grow Up **Amid Surge in Stock Prices**

By H.J. MAIDENBERG

EW YORK — Last week's spectacular surge in stock prices and trading volume will long be remembered by stock-index fotures and options traders as the time their young markets proved themselves to be more than esoteric speculative vehicles. Iodeed, the index and options narkets played a key role in the events of last week

For example, these markets enabled pension funds, mutual funds and other institutions to move quickly and smoothly out of the huge cash reserves they had been accumulating since early January and, just as efficiently, leap into the stock market with

Holding huge

positions in a

be dangerous.

wild market can

"Many institutions, which were the prime movera of the arket, were able to use the index futures and options to "pre-position" their purchases has well as hedge them against the resultant exposure," said Gregory M. Kipnis, manager of the stock index department

at Donaldson Lufkin & Jen-

Pre-positiooing involves
buying index futures and options over a period of days or even
weeks before buying the actual stock. This serves several purposes. For one, the buyer can then move into the stock market

without unduly driving up prices beforehand.

But if the large orders do provoke a buying panic, as was the case last Friday, the higher prices the investor must pay may be largely offset by the profits made on the index futures and options and the stock options.

The institutions and other large investors know that taking any large position long or chort is tricky constituted.

any large position, long or short, is a tricky operation; that prices can run away from them easily because all traders operate in a fishbowl," Mr. Kipnis said. "But by pre-positioning themselves in the index markets, they can avoid, in effect, chasing the prices of the stocks they want to buy or when they want to sell their

OR individual investors, portfolios can be hedged by selling index futures or buying options puts. Holding huge positions in a wild market can be dangerous as well as unnerving. Twice last Friday, Mr. Kipnis noted, the premium of the spot September-index futures over the cash indexes narrowed to the point that some nervous investors feared the market was about to turn around. Normally, prices of index futures are at a premium over the actual index. This premium is based on a formula that reflects the difference between current interest rates and the dividend yield of the stocks in the underlying index.

Rather than start selling shares they had just bought, these aervous investors and quite a few traders sold short futures based on the Standard & Poor's 500 index, the American Stock Exchange's Major Market and Market Value indexes, and the New York Stock Exchange Composite Index. When their fears were allayed, these short positions in the futures were lifted quickly.

allayed, these short positions in the futures were lifted quickly.

"Markets often don't wait for investors, and moving out of auge cash positions quickly can be awkward and time-consuming or institutions." Mr. Kipnis said. "But shifting from Treasury pills, bank certificates of deposit, and other cash reserves into securities can be done quite smoothly if the cash is first moved into index futures and options in a pre-positioning operation."

The institutions had quite a bundle of cash to shift last week. The action began after Paul A. Volcker, chairman of the Federal Reserve, told a congressional panel the week before that the central bank would not tighten credit in the foreseeable future. For example, Between early January, when rising interest rates

For example: Between early January, when rising interest rates (Continued on Page 14, Col. 4)

U.S. Deficit On Trade Is Record

Rate Is Running Above Last Year's

WASHINGTON — The U.S. foreign trade deficit hit a record \$26.3 billion from April through June, the Commerce Department reported Monday.

The new three-month record topped the former high mark of \$25.6 billion that was set in the first

If trading continued at the same rate for the second half of the year, there would be a deficit of \$103.8 billion for the year, far exceeding last year's record total of \$61.1 bil-

Commerce Secretary Malcolm Baldrige noted that deficits this year are running well above the \$15.3-billion quarterly average set

He predicted that an even broader measure of trade, the current account, would likely double last year's deficit of \$41.6 billion. The current account gives the fullest picture of the country's trading performance because it measures not only trade in merchandise but also in services, which include in-vestments by Americans overseas and foreign investment in the Unit-

Mr. Baldrige's prediction for 1984 would mean that the current account deficit had soared ninefold In two years. The deficit in 1982 was \$9.2 billion.

Mr. Baldrige predicted improve-ment beginning in 1985 stemming from "slower growth in the United States, faster growth in foreign economies and some decline in the

The weaker performance in the second quarter was attributed partly to a 7-percent increase in petroleum imports. Other imports dropped I percent, the government

Also, U.S. sales abroad were down a slight I percent. The export decline was shalpest in agricultural categories, which were down 10

The \$9.2 billion recorded in agricultural sales reflected a 12-percent drop in soybeans and a 10-percent

ment-in-kind acreage reduction

The average price of soybeans was up 5 percent, while corn rose 2 percent and the price of sunflower

dollar, which makes imports relatively inexpensive and U.S. goods more difficult to sell on foreign A separate Commerce Depart-

ping and insurance have not been included.

Briton Intends to Rebuild Kaiser

ITC Proposal Will Help Him, **Analysts Say**

By Thomas A. Hayes
New York Times Service
LOS ANGELES — The steel business on the West Coast of the United States has long been ruled by Japanese and South Ko-

ruled by Japanese and South Ko-rean producers, whose low labor costs and technical skills long ago brought the once-reigning Kaiser Steel Corp. to its knees. Now, though, a British-born entrepreneur who is about to take over the Kaiser works in Fontana, 45 miles (72.5 kilome-ters) east of here, is confidently predicting that the combination predicting that the combination of tow costs and proximity to customers will enable him to

overtake the leaders.
"We're looking for something on the order of 25 percent of the market within the first year, with most of it replacing imports," said Michael Wilkinson, presi-dent of newly formed California Steel Industries.

Many steel analysts think that Mr. Wilkinson, 46, who is a suc-cessful distributor and fabricator but untested in production, has a good chance of success. There are many reasons, they say, not the least of which is a tough, new stance at the International Trade Commission against subsidized

imports. Mr. Wilkinson, who owns 50 percent of California Steel, pro-ceeded with a \$110-million offer for Kaiser's Fontana works after the ITC recommended, in a 3-to-2 vote on July 11, several sanc-tions and quotas against steel im-ports. President Ronald Reagan has to decide whether to accept the 1TC recommendations by

Sept. 24. Specifically, the ITC urged Mr. Reagan to set five-year import quotas of 6.4 percent to 31.8 percent depending on the prod-uct and year. It also recommended raising import dutues after imports of steel totaling I.5 mil-

The threat of sanctions, analysts suggest, was one reason that Kawasaki Steel Corp., Japan's fourth-largest steelmaker, decided to join Mr. Wilkinson in making the bid to Kaiser, which was nounced within days of the

The Fontana works, sold by Kaiser Steel to Michael Wilkinson, inset, president of California Steel.

Kawasaki, which had considered hidding for the Fontana works for more than a year with an Australian partner, owns 25 percent of California Steel. The other major partner, also with 25 percent, is Rio Doce Ltd., a subsidiary of the world's largest iron-ore producer. Companhia Vale do Rio Doce SA of Brazil.

The combination of Mr. Wilkinson's knowledge of West Coast steel markets, Kawasaki's teehnical strength and Rio Doce's low-cost iron ore "is quite powerful," said Scott Palm, a senior research associate at Charles River Associates, a consulting concern in Boston.

California Steel intends to buy raw, or semilinished, steel slabs from a Brazilian company in which Kawasaki holds a 14-per-cent stake, Companhia Siderur-gica do Tubarao, then run it through rolling mills at Fontana.

Mr. Wilkinson said the mill primarily will be making coils, sheets, piping and construction steel at the plant. "Our biggest single advantage will be the ability to give people what they want when they want it," he said.

Mr. Palm of Charles River Associates said that imports had "just about all" of the market for products California Steel plans In make. According to the American Iron and Steel Institute, the overall figure is more than 50 percent of semifinished steel. Nationally, the total is about 25

U.S. Steel Corp. is the only company now making raw steel in the West, at its Utah Geneva works. However, several mini-mills, including one operated by Nucor Steel, make steel from scrap and have been profitable in

Mr. Wilkinson beads Techrim in Long Beach, California, a producer of sporty, automotive wheel rims. He bought all his steel for Techrim, and another company, a pipe maker, from Kaiser because it was so close, he

Merrill Agrees To Buy Broker From Paribas

NEW YORK - Merrill Lynch & Co. announced Monday that it had agreed in principle to buy the troubled New York securities firm Becker Paribas Inc. from Cie, de Financière de Paribas for about \$100 million of Merrill Lynch

Paribas, the state-owned French bank holding company, is to re-ceive 3,150,000 shares of Merrill Lynch stock, the companies said. Merrill shares were trading Mon-day afternoon at around \$32.50 apiece. The companies said the price is subject to certain financial

Becker Panbas is the 17th largest U.S. securities firm and employs about 2,300 people in 19 of fices in the United States and abroad. Paribas's involvement in the firm dates from 1974, when the French company and the British merchant bank S.G. Warburg & Co., eager to expand their U.S. husiness, agreed to merge with A.G. Becker & Co., then a Chicagobased securities firm. Warburg last year sold its stake to Paribas, and earlier this year Parihas bought the remainder of Becker Paribas from employee-shareholders.

Merrill's announcement caught many analysts by surprise.

This makes no sense at all, given that Merrill Lynch is in the midst of a massive reorganization," said Joel Rosenthal, an analyst at Jesup & Lamont Securities Cn. "It's just a distraction from the important tasks at hand."

Merrill Lynch, the higgest U.S. securities firm, recently announced plans to trim its 38,000-member work force by 2,500 employees in 1984 and seek additional cost cuts. Two weeks ago, the firm reported a second-quarter loss of \$32.8 million, compared with profit of \$112 million a year earlier. Before accounting for income tax-related benefits, the company had a 1984 second-quarter loss of \$90.8 mil-lion, the largest operating deficit in its history.

Noting that Becker Paribas "has had severe financial problems recently," Mr. Rosenthal said Merdrain on the company's funds."
Paribas recently injected about \$80 million into Becker Parioas, hut analysts said the firm contintied to suffer substantial losses, primarily in bond trading. Becker Par-ibas had about \$176 million in

capital at the end of 1983, but that figure has been trimmed by heavy tosses in the first half, analysts said. There's no eapability that Becker has that Merrill Lynch doesn't already have several times over," Mr. Rosenthal said.

But James Hanbury, an analyst for Wertheim & Co., said Becker Paribas's commercial paper and other money market operations would complement those of Merrill. Commercial paper issues are short-term promissory notes with which top-rated corporations can raise funds.

Dollar Rallies Against Mark

LONDON — The dollar staged a 1½-pfennig rally Monday hut slipped against other major currencies. Gold closed higher.

The dollar closed in Frankfurt at 2.8809 Deutsche marks, well up from 2.865 at Friday's close. In London, the dollar reached a 2.8880 DM high in the afternoon, in Paris, the dollar was off slightly against the French franc at 8.797, compared with 8.825 Friday. The dollar also fell in Tokyo to 241.60 yen from 243.875. In London, the pound traded at \$1.3205, down from \$1.323.

Gold prices were slightly higher, maintaining Friday's surge that pushed gold up \$5 to \$6 an ounce in Zurich and London. Bullion closed Monday in Zurich, the main trading center. at a bid \$349.50 a troy ounce. up from \$349.25 late Friday. Silver bullion traded in London at a bid \$7.675 an ounce, up

The government blamed those decreases on low inventories brought about by last year's Pact Being Developed on Flags of Convenience

By Brij Khindaria nal Herald Tribune

GENEVA - About 100 countries have reached a broad consensus recognizing the need for a new international agreement to regulate ten for the country's foreign-trade problems is the high value of the worked out.

The consensus emerged at a United Nations conference on conditions for the registration of ships that ended late Saturday night here. The conference president, Lament report 10 days ago put the mine Fadika of the Ivory Coast, second quarter deficit at an even said the talks had greatly improved said the talks had greatly improved

BUSINESS ROUNDUP

U.S. Corporate Profit Growth Slows

By James Sterngold

NEW YORK - Buoyant economic expansion continued to lift tense competition from both domestic and foreign companies," said Edward A. Yardeni, chief from the vigorous level of recent quarters, partly because of miense ompetition and high interest rates.

Economists said the results confirmed initial estimates of better than 20 percent growth in profits, compared with the 40-percent increase in the first quarter.

According to a compilation by

The New York Times of secondquarter earnings reports from 274 companies, 209 companies showed improved results, and 55 fared worse than last year.

The results from two companies showed no change and no compari-son could be made for eight compa-nies created by the breakup of the Bell telephone system.

For the third quarter, the economists are forecasting a further cooling of profits as the economy's expension moderates from the 10.1-percent rate reported for the first quarter and 7.5-percent rate for the second quarter, as measured by the gross national product. "It was a strong quarter, but the

facing a decline in new orders.

theme running throughout was good growth in unit sales, with low pricing flexibility because of incurities Inc.

"This will probably get worse in the second half." He cited deregulation and cheaper imports caused by the strong dollar as reasons for the increased

competition, which, he said, is helping keep inflation in check.
Robert Ormer, chief economist at the Commerce Department, contended that a truer measure of corporate health was operating income, which showed more robust expansion than after-tax earnings.

This indicates, he said, that "cor-

porate cash flow has been very, very strong."

The automakers once again set the pace. General Motors Corp., Chrysler Corp., and Ford Motor Co. reported combined earnings of \$3.3 billion, a quarterly record. Heavy demand, limits on imports, and a preference for larger

cars helped the industry.

Many of the steelmakers finally went into the black, with the larg-

West German Construction Industry

WIESBADEN. West Germany — After experiencing a surge in demand in the fall of 1983, the West German construction industry is

Between January and May of this year, new orders fell a real 7

percent overall compared with a year earlier, the Construction Build-

ers Federation reported Monday. And in the home-building sector,

new orders were down 22 percent in May.

In addition, the industry's costs outpaced prices in May, rising 3.3 percent compared with a 1.1-percent increase in prices. The federation warned that increasing costs could not be covered this year and

Meanwhile, bankruptcies in the building industry increased 11 percent to 87l in the first five months of 1984 from last year.

However, a backlog of existing orders will increase construction figures for the year by 4 to 5 percent. But building in 1985 will be "stagnant" and may decrease in 1986, according to Heinrich Ladik,

Mr. Ladik blamed the lower demand on the government's decision

to end tax incentives for construction companies and home buyers, in

addition to concerns about the economic recovery and unemploy-

In Jaguar PLC Oversubscribed

Offer of Shares

LONDON - Jaguar PLC said Monday that the offer for sale of 177.9 million of its ordinary shares at 165 pence (\$2.18)

each was 8.3 times oversubscribed_ The sale of nearly 100 per cent of the luxury car maker, intaling £293 million, transfers ownership from BL PLC, the

state-owned automaker, to pri-

vate investors. The number of applications was about in line with expecta-tions. Though applicants thronged London's financial district last Friday, many of the applications came from investors requesting small numbers of shares.

Shareholders and employees of BL had preferential rights in the sale. Their applications will be satisfied in full, Jaguar said. The number of shares allotted to other applicants is to be de-termined on the basis of a slid-ing scale, based on how many were requested.

Acceptance letters are expected to be posted to successful applicants Thursday, and dealings in the shares are due to begin Friday. Jaguar advised investors not to deal in the shares before receiving letters of acceptance.

The company promised to return checks to unsuccessful applicants as soon as possible.

Airbus Industrie said it sold two

wide bodied A-300-600 aircraft to

President Sheikh Zayed Bin Sultan

Enmirates. The aircraft will be de-

livered in 1985, and the transac-

tion, the price of which was not

disclosed, brings to 355 the total

sales of the A-300 range, the com-

pany said.

AMSTERDAM DEPOSITARY COMPANY N.V. 1981. In Aug., 1981.

THE FIFTH ANNUAL INTERNATIONAL HERALD TRIBUNE/ OIL DAILY CONFERENCE LONDON, OCTOBER 18-19, 1984

Conditions in the world oil market have never been more complex. Unstable political situations, uncertain price trends and megamergers have all led to radical shifts in the oil

In view of the current situation, this year's International Herold Tribune/Oil Daily conference on the theme "Oil and Money: Strategies for the Eighties", has never been more timely.

Reuters

TOKYO — Japan's Ministry of ternational Trade and Industry id Monday that it will cut the sor price for video tape recorders ported to the European Commuty by 5,000 yen (about \$20.60) in d-August. It said it decided on the cut because of the yen's appreciation ainst EC currencies by more than percent on average from late 83 and because of reduced procition costs.

Kaiser Steel Libya Reportedly to Pay New Markets Being Rebuilt Debts to Italy With Oil Come of Age (Continued from Page 9)

able in get what we wanted when we wanted it," he said. As owner of the plant, he expects in make deliveries within four weeks of order. East Economic Survey, an authoricompared with a minimum of three

months for imports, he said.

"He ought to be very competitive," said Ralph F. Thompson, acting director of the iron and steel division of the Commerce Depart-

Mr. Thompson added that Kai-ser's finishing mill, including a continuous caster and basic oxygen furnace, were repeatedly upgraded Mr. Wilkinson echoed that view.

He said California Steel would spend about \$10 million to get the mill ready in produce by October. The plant, opened by Kaiser in 1943 to produce steel for war ships and still the only steel-producing site on the West Coast, was shut-

tered last December. Kaiser was acquired by Joseph A. Frates, a Tulsa, Oklahoma, in-dustrialist, for \$750 million last February. Kaiser recorded reve-oues of \$277 million in 1983, but it suffered a net loss of \$422.8 million, most of it tied to closing the Fontana mill.

The agreement with California Steel to take over the Fontana works is expected to be completed "not later than" Aug. 17, according to a Kaiser spokesman, Joseph

"The large presence of imported rate large presence of imported steel in California kept prices artificially low," he said. But imports were not the only reason Kaiser wanted to get out of steel. Another was its inability to get wage concessions from the steel union, he said. "Our labor costs were higher than the vect of the industry." he said

the rest of the industry," he said.

Low-cost semifinished steel imports and Kawasaki's fabricating processes will help reduce produc-tion costs at Fontana, but the main reason California Steel's over-all costs will be markedly lower than Kaiser's is that it plans to use oonunioo labor, according to Mr. partment

halted the stock market's 16-month advance, and June 30, the mutual fund industry increased its cash reserves in \$12 billion, its highest level in five years, from roughly \$9 billion. As a percent of total assets of the funds, the rise was to 10.5 percent from 7.5 percent.

Pension funds, whose assets exceed \$650 billion, took five times the assets of the mutual funds and they increased their cash reserves in this period in 11 percent from 8

What was most remarkable last week, Mr. Kipnis said on Sunday, was that the index futures and most options markets were able to handle the huge volumes from buyers and sellers so easily.

"Many 'quick-study' portfolio managers took advantage of the early opening time of the Major Market Index futures market on the Chicago Board of Trade to get the chicago Board on Hade to get bargains last Friday and earlier in the week," Mr. Kipnis noted. That futures market opens at 9:45 A.M. local time, or 15 minutes before the New York Stock Exchange.

"From the time the index man kets opened a few years ago, most institutional portfolio managers had been skeptical, to say the least, about the index markets," Mr. Kip-nis said. "But the events of last week and, perhaps more important, the ease with which they were able to preposition themselves for the buying binge before then, made be-lievers out of a lot of them."

More Foreign Firms Set Up in Hong Kong

HONG KONG -- The oumber of foreign businesses with establishments in Hong Kong totaled 1.954 at the end of June, up 10.6 percent from 1.767 a year earlier, A total of 119 new companies, were registered in the first half of 1984 and 37 were deleted from the

Net Inc. 449 214 register in the same period.

EC Output Up By 2.1% in May

BRUSSELS — Industrial production in the 10-nation European Community rose a seasonally adjusted 2.1 percent in May from the month before, the EC's statistics office said Monday. Output, as measured by the Eurostat index, had fallen 1.6 percent in April. Among the larger member countries of the EC, West Germany posted a 3-percent gain in May compared with April, France was up 2.0 percent, Italy gained 3.2 percent and Britain fell 0.8 percent.

Eurostat said its indicator of industrial production trends fell 0.7 percent in May from the month before, suggesting that the pace of indus-trial expansion in Western Europe had "come to a standstill."

The indicator is a ratio of industrial produc-tion in the March-May period to the preceding three months. The trend indicator fell 2.8 percent in Britain and was down 1.6 percent in West Germany:

HILAIRE BELLOC: 4 Biography

By A. N. Wilson. 398 pp. 517.95. Atheneum, 597 Fifth Ave., New York, N.Y. 10017. Reviewed by Michiko Kakutani

NUDE, noisy and blustering, often bigoted and always ebulliently contentious. Hillaire Belloc was one of those British men of letters whose personalities overshadowed their work. At his best, he was one of the finest writers of English prose around, and as an author of light verse, he had few peers. Belloc, however, did not confine himself to literature. He regarded himself as an expert on history and politics, and his views on such subjects could be irresponsible, even dangerous.

Wilson's shrewdness as a nivelist is displayed to excellent effect in this life of Belloc. Although there are a few minor irritations overworked transitions and repetitive quotes, doubtless the result of hasty composition—the book reads with the grace and conversational ease of fiction. Playing the role of a not entirely omniscient narrator. Wilson makes both Belloc's inner life and his celebrated encounters with figures like G K Chestertan and H. G. Wells feel palpable and real. Belloc's trek across the United States to visit his fiancee, Elodie Hogan; his taking of Oxford hy storm; his restless, sometimes ridiculously pointless wanderings across Europe are fluently orchestrated with an understanding for the

where Wilson's ability to sympathize gets him into trouble is with the more disturbing aspects of Belloc's life and works Belloc could be a terrible hypocrite and snob - he taught his wife, an American, to speak with an English accent, and enjoyed having fancy dinners with the same Edwardian aristocrats he so liked to mock in public. Such matters, however, are simply passed off by Wilson as the charming eccentricities of a "genius"
As portraved by Wilson, Belloc emerges as a

tortured individual, adept at using his gifts for self-dramatization to avoid emotional exposure. He was a loner, given to melancholy, who filled every moment of spare time with frantic socializing: a would-be country squire who longed for the permanence of a real home but who spent most of his life traveling about the world: a devout Roman Catholic, whose intel-lectual embracing of faith did nothing to as-suage his inner sense of despair. The persona that he affected in his writing and in public -"the great elephantine, rumbling Belioc." "always on the move, always grumbling, always late, always angry" — gradually displaced the private man, and in the end Belloc became a sort of caricature of himself, alienated and

Hilaire Belloc

The death of Elodie, shortly before the out-break of World War I, effectively changed Belloc's entire world. His widower's outfit - a hlack suit, a black cloak and a huge hlack hat - became his daily uniform, and he grew increasingly belligerent and self-absorbed Though he would go on, churning out book after book — in one two-year period he write 17 volumes — his life had been irretrievably diminished. His last years, described by Wilson with novelistic skill, were spent at home, in the childish solipsism of old age — the hour-passed in "a happy re-perusal of his own

A Toast to Progress

By Russell Baker

NEW YORK — Forty years ago every other person you saw at the swimming pool had a big scar on the right side of the abdoletting doctors know that I have an men where the surgeons had gone occasional headache. in and plucked out an appendix.
Doctors at that time loved to do appendectomies. One of the terrors of childhood was a bellyache, because you could be fairly certain that if your mother told the doctor It is natural for the technician to about it you would be whisked into say. "Anybody can do these old a hospital, sliced open, and wake appendectomies; I want to break

up with your appendix gone. What reminded me of this bygone era of low-tech surgery was the nasty struggle my electric toaster put up at breakfast. First it refused to do any toasting whatever, then, when I insisted, it burnt the toast to charcoal.

This is the eighth or ninth toaster we have had sloce the second Eisenhower administration, and experience has shown that it is a waste of time shopping for a toaster that prides itself on making toast.

American technology no longer has the slightest interest in making toasters. Somewhere back there, technicians got bored with making toasters, just as American doctors got bored with appendectomies.

There seems to be a law of perverse development at work here. gery from the time doctors perfected the appendectomy got bored with it and began concentrating on gall-bladder removal.

Suddenly, people whose appendectomy scars were 15 years old began turning up at the swimming pool with fresh scars. "Gall blad-der" they would say. It was the latest surgical fashion.

Then came the era of high tech. Open-heart surgery, Heart trans-plants, Artificial hearts.

At this stage I ooticed that it had been years and years since anyone of my acquaintances had had an appendix or gall bladder removed, whereas several had recently undergone open-heart surgery.

Lately, some doctors have been

saying there may be more openheart surgery than is strictly oecessary. I leave this argument to doctors, but cannot help ooting increasing medical interest in brain surgery. This makes me wonder if the heart transplant won't soon

just as the appendectomy once gave way to gall bladder removal. Am I worried by this prospect?

letting doctors know that I have an

tinuing to do what they can do well. new ground and do gail bladders." And then: "Do hearts."

And then: "Do brains."

Someone will say, "but you can still get a very good appendectomy if you shop around." But will it be an appendectomy of the highest quality which you could have had if all the top graduates in surgery had stayed with the appendix instead of flocking to hearts and brains?

Of course not, I hope it will not be an appendectomy as botched as the toast which my toaster provides every morning. It probably won't be, since the American Medical Associatioo is fussier about standards than the toaster-maker industry is.

The last good toaster was made in 1950. I still have one, and it still works beautifully, though I keep it m a safe-deposit vault most of the time, figuring that when the worst comes it will oet me a fortune at Sotheby's auction room.

In 1951 the geniuses who made this extraordinary toaster — that toaster that worked — started saying, "Anybody can do these old toasters: I want to break new ground and do three-dimensinal elevision.

Well they made a mistake, of course. They should have done color television instead of three-dimensional. Better yet, they should

have stayed in toasters. So today what do we have? Io the parlor a \$3,000 computer which was fun for a lot of high tech guys to build and for which you can't think of any very sensible use. And in the kitchen a toaster that can't

make a piece of toast, That's the law of perverse development in action. To get the miracle of open-heart surgery, we have

Art Buchwald is on vacation.

The Lady Bountiful Of Wolf Trap Park

By Sarah Booth Conrov

Washington Post Service
WASHINGTON — The story goes like this: After Wolf Trap's first season, second performance, the conductor Julius Rudel remarked that the airplanes weren't as bad as the night before.
"Don't you know?" came the answer.

"Mrs. Shouse had them all shot down over Maryland.'

Catherine Filene Shouse, no matter what you've heard, is not a Wagnerian goddess throwing thunderbolts from the stage of Wolf Trap Farm Park for the Performing Arts, which has just opened its 14th season. At 88, Shouse is the personification of Wolf Trap. She gave 100-odd acres (40 hectares) and \$2.3 million to build the original auditorium. More than that, she has given the project her unrelenting atten-

tion for almost a quarter of a century.
On June 9, Shouse celebrated her 88th birthday at a supper for the 500 workers who rebuilt Wolf Trap Filene Center after

a disastrous fire.
"I think I'm the only one still around born in the last century." Shouse said. She is one of the last of her kind — a personage. Lady Bountiful philanthropist, do-gooder, a presence, essence of grande dame. She used to play tennis with Caivin Coolidge. Her blond hair is carefully dressed, her heavy gold bracelet is incidentally a watch. After two broken hips, she needs two walking sticks, and sometimes a wheelchair for big parties. Her voice is a bit soft from the ravages of flu and her hearing's oot as

sharp as it once was.

Shouse herself said she's trying to do less and less. "At 88, I find I have limitations." Still, she has a sturdy lonk to her, oone of the fragility of some octogenarians.

Nearly every day, she welcomes program planners to talk about the 1985 season, or some other vital group of the nation's only performing arts park. Shouse is one of the few private citizens

to hold top honors from three great world powers: the first woman to receive the West Germany's Commander's Cross of Merit, a dame commander of the British Empire and holder of the United States' highest civilian award, the Medal of Free-Her 12 hooorary doctorate diplomas and

the scrolls attesting to some of her 41 awards and decorations hang on the walls of her private upstairs study, along with formal portraits of her favorite boxer stud. Shouse's 1850 town house, with a dining room that seats 40, may be the last private residence three blocks from the White

House. She's leaving the house to Wolf Trap, as a town office. But she wonders what to do about her grandfather clockwhich actually belonged to her grandfather. "It's too tall for any of my grandchildren's houses." She has other bouses at Easton, Maryland, and Naples, Florida, "I collect houses," she said.

Shouse is still bitter about the fire that in April 1982 destroyed the Filene Center. She believes it would not have been as great a disaster if there had been an alarm, if the guard had had a key to the area where the fire started, if the telephone had worked. Shouse said her effort to rebuild Wolf Trap "is the hardest thing I've ever done."

Officially Shouse is still chairman of the program committee but Beverly Sills, the very active deputy chairman, carries a great deal of responsibility. "I've asked them to let me retire. I don't

even have time to read a book," Shouse said. "I work for Wolf Trap eight hours a

day."
"Wolf Trap occds her," said Carol Har-ford, president of the Wolf Trap Foundation. After all, she asks, who else can and will -call the president of the United States when the need comes?

Shouse herself said she has no worry

about what will happen to Wolf Trap. Others have not been so confident about Wolf Trap's future. In its first 10 years, at least 10 different people served in top man-agement jobs. In the past three years, severmore have come and gone. Shouse explains it this way: "We've had

bad luck with people as head of program-ming. They work well for a year, then they become self-promoters. But few people who have left us don't want to come back." Wolf Trap hasn't been a total personal satisfaction to Shouse. When she thinks about all she's done in her life, she said

she's prouder of the \$400,000 she raised for Hungarian relief in 1956 in less than a "I did it so quickly and all by myself. Many other people have helped at Wolf Trap." Her father, Lincoln Filene, son of a German emigrant who founded the Fi-lene's women's apparel shop, and her

mother was an ardent suffragist. "My mother and father both thought women should be able to vote. And later, both my busbands encouraged me to be active,"
Shouse went to Vassar briefly, and then
to Wheatoo College, in Norton, Massachusetts. Her family gave her a car for gradua-

During the Depressioo years, she said she was not well off. Her father had given tion bot they were not pleased when she drove off in it to Washingtoo in 1918. She

Catherine Shouse

en's division of the Labor Department's employment service. "My father thought I should be stayed in Boston. He disinherited me for three months." During her only salaried job, Shouse

called a conference to encourage compa-nies to hire women to replace men who had gone to war. "DuPont said they couldn't use women because of the odors in the laboratory. One woman stood up and said. 'Is it worse than cabbage in the kitchen?' After the war, Shouse went back to Boston and her interest in politics. She was on the state Democratic committee and represented Massachusetts as its first woman appointed to the Democratic National mmittee. In 1925, with Daisy Harriman,

she founded the Women's National Democratic Party. Is she sorry she didn't pursue a political career? "No." she said. "Though, I know I could've won. The people in my state were behind me. But I've always been afraid of the physical demands of a full-time job." Shouse turned her studies into a book,

"Careers for Women," published by Houghton Mifflin Company in 1920. It served as her thesis when she earned her naster's degree in education at Harvard College. She married her first husband, Alvin Dodd, in 1921.

her \$190,000 when she married, "He never believed in stocks. But I thought I knew.

WANTED/EXCHANGE

EMBASSY SERVICE

better. So I invested the mivney and after a while I made a million.

Shouse found that she had lost everything to the 1929 stock market crash except \$10,000. She spent half the money to buy a farmhouse and the land that became the site of Wolf Trap.

Kay and Alvin Dodd were divorced in 1930. While she was getting ber divorce, she met Jouett Shouse at a party given by Daisy Harriman, He had been a congressman, and assistant secretary of the Treasury under Wilson and a chairman of the Democratic National Committee He was

18 years older than she.

Shouse credits him with speatheading the repeal of Prohibation. "We used to get telephone calls from the governors of the states all night long about repeal."

They were married in 1932, and from then on she left politics to him. She bred. showed and judged dogs alongside his sta-

In 1947. Shouse's father established a trust fund for her. Though she couldn't buy stocks with the principal — that's all invested in the Federated Department Stores, she has used the interest to play in

the stock market since. "But I don't have as much money as people think I do," she said, offering more

coffee and cookies.

She took up the family interest in music. in 1935 when she organized Washington's first chamber music concerts at the Phillips Collection. In 1945, she and Shouse were traveling in Germany when at a dinner party, she heard of the U.S. Army's German youth program. She organized the General Lucius Clay Fund for the program in the United States. "I once shipped a quarter of a million tons of bolt ends of fabric and leftover art material to Germany," she recalls. "I gave all my time to it from 1949 to 1956."

Almost all of her time. She became a member of the National Symphony Or-chestra Association Board in 1949, was its vice president from 1951-1968 and has. been its honorary vice president since then. She was the National Symphony Orchestra's largest contributor for many seasons.

In 1958 she was appointed by President Eisenhower to the first board of the National Cultural Center, which became the Kennedy Center for the Performing Arts. For years, she bad talked about building a performing arts center at Wolf Trap. The

National Symphony was not interested. But in 1961, she gave 40 acres to the American Symphony Orchestra League. In 1966, she offered the rest of the Vicana farm to the nation, Congress accepted the gift of the land and the money to build the amphitheater in October 1966. Wolf Trap Farm Park for the Performing Arts

opened July 1, 1971.

Shouse says she never looked for something to do. It always dropped in front of me. My father always said, 'You don't get credit for doing the things you like to do.' Well, I've always had fun."

PEOPLE

8 Riders Cross the U.S. On High-Wheel Bicycles

Eight people dressed in kneenants, caps and ribbon ties rode into Boston perched on old-fashioned high-wheel bicycles, completing a 53-day cross-country journey in torn-of-the-century, style. The bicycles, with their tall tear wheel, are difficult to ride.

"You're always sitting," said Keles. "You're always sitting," said Keith Pariani, 34, of Sanford, Florida. Yoo're not allowed to stand. Some of them are not equipped with brakes; none of them has gears." The riders, aged from 28 to 64, and from all over the United States, made the trip because the bikes "are part of our heritage," said Nolan Bay, 62, of Culver City, California. The ride also commen orated Thomas Stevens, who went from San Francisco to Boston on a high-wheel broycle 100 years ago.
"He had to walk one-third of the way because there were no roads." Parishi said. "Sometimes he would go 24 hours without eating because he could carry no provisions with um." The riders set out from San Francisco on May 28.

An annual festival billed as the United States's largest gathering of twins brought about 1.000 sets of siblings to the northeast Ohio city of Twinsburg. "It's a day to show off your twins," said Kent. Ono, postmaster Ray Diersing, father of Betsy and Susan, both 9. The two-day festival is a memorial to twin brothers Airon and Moses Wilcox. for whom the city is named. The two Connecticut natives settled in Ohio in 1817, married sisters, had the same number of children, held property in common, died on the same day of the same illness and are buried in the same grave. The first Twins Day in 1976, a Bicentennial celebration, attracted only about 33 sets of twins, but television exposure since has brought in thousands of visitors. This year twins attended from all 50 states and at least two foreign countries, the organizer, Wib Cramer, said.
